

**About Intellore:**

Intellore is a young company of experienced professionals. The company provides co-creation technology services for our customers and their ecosystem partners enabling each stage of their digital transformation journey for them to innovate and create new value for all the stakeholders. These services, where the IP of the offering belongs to our customer, range from domain-specific intelligent sensor / edge devices to cloud platforms right up to Differentiated / Insightful enterprise applications. These services for today's fast-evolving digital and connected enterprises are based on the solid foundation of vast proven experience and track record in “embedded systems services” and “application software development services” collectively brought in by our founder-directors and the founding-staff.

**Position:**

UI UX Developer (Software Engineer)

**Job Location:**

Intellore Systems Pvt Ltd,  
Off No 7 & 8, Krishna Shanti Residency, S. No. 346 & 347,  
Bavdhan Budruk, Taluka Mulshi, Pune – 411 021, Maharashtra.

**Job Summary:**

We are looking for a UI-UX Designer (Web/Mobile Developer) who is motivated to combine the art of design with the art of programming. Responsibilities will include translation of the UI/UX design wireframes to actual code that will produce visual elements of the application. You will work with the UI/UX designer and bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

**Responsibilities:**

1. Develop new user-facing features. Build reusable images/icons/UI/code and libraries for future use
2. Ensure the technical feasibility of UI/UX designs. Optimize application for maximum speed and scalability (when using CSS & JS – Compressed version)
3. Assure that all user input is validated before submitting (JS validation)
4. Collaborate with other team members and stakeholders

5. Knowledge of HTTP and web/mobile architecture
6. Proficient in JavaScript and at least one web framework (preferably react)
7. Knowledge of testing and performance analysis of web pages
8. Good understanding of design and UX elements. Should be a quick learner
9. Should have experience in designing for Web as well Mobile application UI/UX
10. Should have experience in creating basic animations
11. Should have hands on experience in handling Image Processing tools (Adobe Photoshop/Adobe/Illustrator/CoreDraw). Aware of Wireframe creation tools (Adobe XD or similar)
12. Proficient in HTML 5, CSS 3, JQuery, Bootstrap 3 & 4
13. Knowledge of any popular UI UX frameworks like vue.js, angular/Knockout.js will be added advantage
14. Knowledge of Material design preferred. Knowledge of CMS framework (Wordpress, Magento, Shopify, NopCommerce etc.) will be added advantage.

**Skills And Qualifications:**

1. Proficient understanding of web markup, including HTML5, CSS3
2. Basic understanding of server-side CSS pre-processing platforms, such as LESS and SASS
3. Proficient understanding of client-side scripting and JavaScript frameworks, including jQuery
4. Hands on experience of using advanced JavaScript libraries and frameworks
5. Basic understanding of back-end frameworks using PHP like WordPress, Laravel is a plus
6. Good understanding of asynchronous request handling, partial page updates, and AJAX
7. Basic knowledge of image authoring tools, to be able to crop, resize, or perform small adjustments on an image
8. Hands on experience of using any GUI tools (for example Gimp or Photoshop)
9. Proficient understanding of cross-browser compatibility issues and ways to work around them
10. Proficient understanding of code versioning tools: Git / Mercurial / Bitbucket
11. Good understanding of SEO principles and ensuring that application will adhere to them
12. Any graduate or BCA equivalent with 3+ years' experience in Web/Mobile UI-UX development
